**Beetle ForTech**  
Timber traceability solutions

# Back-end Developer

We are a vision-driven start-up based in Austria, developing technologies that ensure seamless traceability of wood in an ever-changing regulatory environment. By integrating satellite-based monitoring systems and innovative in situ components into international timber harvesting and transport processes, we enable digitalized supply chain documentation and secure provenance of sustainable resources.

## YOUR ROLE

As **Back-end Developer** you will be part of Beetle ForTech's **Space Program**.

There, you will be:

- Collaborating with an interdisciplinary team to develop and deliver technical strategies and roadmaps.
- Conceptualizing and realizing complex and resilient space solutions.
- Integrating various services from distinct data sources.
- Creating reusable high-quality code.
- Accumulating expertise in the field of remote sensing and forest management.
- Having a huge ecological impact while having fun.

**Earliest start: asap**

**Workload: 38,5 h/week**

**Salary: € 3k – 4k**

## THAT'S YOU:

- Impact driven personality (can-do attitude).
- 3-5 years of experience in back-end development (e.g., comprehensive cloud solutions on Azure, AWS or similar).
- Proficiency in back-end programming languages (e.g., PHP, Java, Python, etc).
- Success record of data and service integration.
- Familiarity with front-end languages (e.g., HTML, CSS, JavaScript, etc).
- Profound understanding of relational and non-relational database systems.
- Familiarity with the latest technologies and respective concepts, such as containerization, Kubernetes, and DevOps.
- Living and breathing agile project methodologies and scaled agile frameworks.
- IT related studies.

## WE OFFER

- You will work in a vision-driven company that aims to stop illegal logging on a global scale.
- Innovation is our vision: you will work on developing integrated space tech for a global timber tracking system. With us, there will always be interesting projects using the latest technologies where you will have plenty of room for personal development.
- We provide high-end equipment for the best results.
- Flexible working hours and remote working options.
- Monthly salary between 3k-4k, depending on your qualifications and experience.

## APPLICATION PROCEDURES

If you want to get going and do your part in tackling climate change, apply now!

Send your application to [matthias.sammer@beetlefortech.com](mailto:matthias.sammer@beetlefortech.com)

Your application should include:

- ✔ Cover letter
- ✔ Curriculum vitae
- ✔ Link to your LinkedIn and GitHub profile
